Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision.
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggragations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, $40.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précémment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

INTER-CORPORATE OWNERSHIP 1992

Will Answer Your Questions About Canada's Corporate Pyramids

Inter-Corporate Ownership 1992
is the most comprehensive and authoritative source of information available on Canadian corporate ownership.

Inter-Corporate Ownership lists over 65,000 corporations providing the names of all holding and held companies, ownership percentages and the position of each within the overall corporate hierarchy.

Inter-Corporate Ownership is an indispensable reference source for researching:

- Business-to-business marketing: who owns your corporate clients?
- Purchases: who owns your suppliers?
- Investments: what else does a company own or control?
- Corporate competition: what do your competitors own and control?
- Industrial development: in which province and industry is a corporation active?

Inter-Corporate Ownership 1992 (Cat. no. 61-517) is available for $325 in Canada, US$390 in the United States and US$455 in other countries. To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication. For faster ordering, fax your order to 1-613-951-1584. Or call toll-free to 1-800-267-6677 and use your VISA or MasterCard.

LIENS DE PARENTÉ ENTRE SOCIÉTÉS 1992

La publication qui répondra à toutes vos questions sur les pyramides de sociétés au Canada

Liens de parenté entre sociétés 1992 est la source de renseignements la plus fiable et la plus exhaustive que l'on puisse consulter sur les liens de parenté entre sociétés canadiennes.

Vous y trouverez une liste de plus de 65 000 sociétés faisant état du nom de toutes les sociétés actionnaires ou détenues, du degré de parenté exprimé en pourcentage et de la position de chacune au sein de la hiérarchie globale des entreprises.

Liens de parenté entre sociétés constitue une source de référence indispensable dans les domaines suivants :

- Commercialisation entre sociétés : qui sont les propriétaires de vos sociétés clientes ?
- Achats : qui sont les propriétaires de vos fournisseurs ?
- Investissements : quelles sociétés l'entreprise en cause possède-t-elle ou contrôle-t-elle ?
- Concurrence entre sociétés : quelles entreprises vos concurrents possèdent-ils ou contrôlent-ils ?
- Expansion industrielle : dans quelle province et dans quel secteur d'activité une société oeuvre-t-elle ?

Liens de parenté entre sociétés 1992
(nº 61-517 au Catalogue) se vend 325 $ au Canada, 390 $ US aux États-Unis et 455 $ US à l'étranger. Pour commander, écrivez à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6, ou encore, communiquez avec le centre régional de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication). Pour commander plus rapidement, télécopiez votre commande au 1-613-951-1584. Ou composez le numéro sans frais 1-800-267-6677 et utilisez votre carte VISA ou MasterCard.

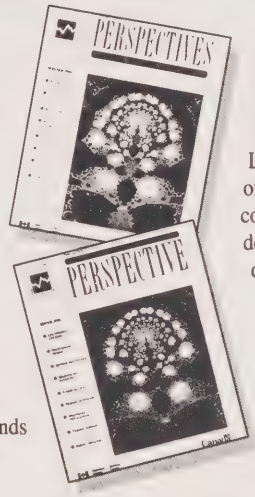
HIRE OUR TEAM OF RESEARCHERS FOR $53 A YEAR



NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53 $ PAR ANNÉE

Subscribing to **Perspectives on Labour and Income** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But **Perspectives** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

And all for only $53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

S'abonner à **L'emploi et le revenue en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un aperçu des projets de recherche en cours;
- de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

Tout cela pour 53 $ seulement!

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

ORDER NOW!
For only $53 (plus $3.71 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US$64 for U.S. customers and US$74 for customers outside North America.

CANADA'S ENVIRONMENT

L'ENVIRONNEMENT DU CANADA

Every day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

Human Activity and the Environment is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

Vous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industrielles ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

Activité humaine et l'environnement est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

CASE STUDY: A statistical profile of an Ontario river basin is also included as a case study to demonstrate how socio-economic information can be linked with physical data at a local level.

ÉTUDE DE CAS : un profil statistique du bassin hydrographique de l'Ontario est également présenté, comme étude de cas, en vue de montrer comment l'information socio-économique peut être mise en rapport avec les données physiques à un endroit donné.

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets
- la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division de la commercialisation, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
♾

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Industrial Product Price Index

According to preliminary figures for October, the Industrial Product Price Index (IPPI, 1986 = 100) rose for the sixth consecutive month to 110.4, a 0.5% increase from the revised level of 109.9 in September. Fourteen of the 21 major product group indexes increased, but six decreased and one did not change. The 2.6% rise in the value of the U.S. dollar against the Canadian dollar was the most important reason for these changes. The autos, trucks and other transportation equipment price index rose 2.4% and the paper and paper products price index went up 1.0%. These two indexes were especially influenced by the U.S. dollar's increase, which raised the prices of exported products denominated in U.S. dollars. However, the primary metal products index declined 1.5%, and the lumber, sawmill and other wood products index fell 1.0%.

Compared to October 1991, the IPPI was 2.9% higher, mainly because the U.S. dollar was up 10.6% compared to the Canadian dollar. The largest price increases over the last 12 months were for autos, trucks and other transportation equipment (7.0%), lumber, sawmill and other wood products (12.8%), and paper and paper products (3.7%). If petroleum and coal products are excluded, the 12-month change for the index was 2.8%.

The first-stage intermediate goods index fell 0.3% in October, mainly because of the drop in primary metal products prices, while the second-stage intermediate goods index rose 0.3%. In final goods, the capital equipment price index went up 1.5%, the all other finished goods index rose 1.0%, and the finished foods and feeds index was up 0.1%. All five of these indexes were higher than a year earlier, with the increases ranging from 1.5% for finished foods and feeds to 4.2% for capital equipment.

According to preliminary figures, the autos, trucks and other transportation equipment price index rose 2.4% in October, mainly due to increased export prices as the U.S. dollar rose, and to the introduction of the 1993-model autos and trucks. Thus the domestic auto price index went up 1.3% while the export market index rose 3.9%. The truck price index was 1.9% higher on the domestic market and 4.7% higher for exports. In comparison with last year, the autos, trucks and other transportation equipment price index was up 7.0%.

Despite declines in domestic prices for newsprint (-0.2%) and sulphate woodpulp (-0.2%), the paper and paper products index rose 1.0% in October because of increased export values as the U.S. dollar rose. Thus the export price index for newsprint was up 2.9% and the sulphate pulp index up 2.5%. Prices of paper and paper products were 3.7% higher in October 1992 than in October 1991 The pulp index was up 25.4%, while the newsprint and other paper stock index declined 2.5%.

The primary metal products price index fell 1.5% from the previous month, mainly because of the 4.8% drop in prices of other non-ferrous metals, particularly refined zinc (-13.8%) and copper and copper alloy products (-3.7%). The primary metal index was 1.8% higher than last year, reflecting an 11.2% increase in aluminum products prices and an 11.5% increase in the prices of other non-ferrous metals. However, a 4.3% decline in the iron and steel products index moderated the overall increase.

The lumber, sawmill and other wood products index declined 1.0% in October. Softwood lumber prices fell in all regions except for the coast of British Columbia, where prices rose 0.6%. The lumber, sawmill and other wood products index was 12.8% higher than in October 1991, with the price of softwood lumber alone rising 22.2%.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres préliminaires d'octobre, l'indice des prix des produits industriels (IPPII, 1986 = 100) a enregistré une sixième augmentation consécutive à 110.4, une hausse de 0.5% par rapport au niveau révisé de 109.9 de septembre. Quatorze des 21 indices de grands groupes dè produits ont augmenté, six ont diminué et un est demeuré inchangé. La majoration de 2.6% du dollar américain face au dollar canadien est la principale cause de ces changements. L'indice des voitures, des camions et autre matériel de transport a monté de 2.4% et celui du papier et des produits connexes de 1.0%. Ces deux indices ont surtout été influencé par l'effet à la hausse, de la majoration du dollar, sur les prix des produits exportés cotés en dollar américain. D'autre part, l'indice des produits métalliques primaires a baissé de 1.5% et celui des sciages, produits de scierie et divers de 1.0%.

Par rapport à octobre 1991, l'IPPI a augmenté de 2.9% surtout parce que le dollar américain s'est apprécié de 10.6% par rapport au dollar canadien. Les indices ayant le plus progressé au cours des douze derniers mois ont été ceux des voitures, des camions et autre matériel de transport (7.0%), du sciage, produits de scierie et divers (12.8%) et du papier et des produits connexes (3.7%). Enfin, l'IPPI sans les produits du pétrole et du charbon est en hausse de 2.8% par rapport à octobre de l'an dernier.

L'indice des prix des produits semi-finis de première étape a baissé de 0.3% en octobre, surtout à cause de la diminution des prix des produits métalliques primaires alors que l'indice des produits semi-finis de deuxième étape augmentait de 0.3%. Pour ce qui est des produits finis, l'indice des prix du matériel capitalisé a progressé de 1.5%, celui des prix de tous les autres produits finis de 1.0% et celui des aliments de consommation et les aliments pour animaux de 0.1% . Ces cinq indices étaient tous plus élevés qu'il y a un an, les hausses annuelles étant comprises entre 1.5% pour les aliments de consommation et les aliments pour animaux et 4.2% pour le matériel capitalisé.

Selon les estimations préliminaires, l'indice des voitures, des camions et autre matériel de transport a grimpé de 2.4% en octobre en raison surtout de la majoration des prix à l'exportation due à l'appréciation du dollar américain et de l'introduction des modèles 1993 d'automobiles et de camions. Ainsi, l'indice des prix domestiques des automobiles a augmenté de 1.3% et celui pour les marchés d'exportation de 3.9%. L'indice des prix des camions était en hausse de 1.9% sur le marché domestique et de 4.7% à l'exportation. Enfin, l'indice des voitures, des camions et autre matériel de transport était 7.0% superieur au niveau de l'an dernier.

Malgré les reculs des indices des prix domestiques pour le papier journal (-0.2%) et la pâte de bois au sulfate (-0.2%), l'indice du papier et des produits connexes a augmenté de 1.0% en octobre en raison du relèvement des prix à l'exportation entraîné par l'appréciation du dollar américain. Ainsi, l'indice des prix à l'exportation pour le papier journal a progressé de 2.9% et celui de la pâte de bois au sulfate de 2.5%. D'autre part, les prix du papier et des produits connexes étaient 3.7% plus élevé en octobre 1992 qu'en octobre 1991. L'indice de la pâte était en hausse de 25.4% alors que celui du papier journal et des autres pâtes travaillées était en baisse de 2.5%

L'indice de prix des métaux primaires a fléchi de 1.5% par rapport au mois dernier. Cette diminution est surtout le résultat de la baisse de 4.8% des prix des autres produits de métaux non ferreux plus précisément les prix des profilés d'affinage de zinc (-13.8%) et de 3.7% des prix.des produits du cuivre et d'alliage de cuivre. Par rapport à l'an passé, l'indice des métaux primaires était en hausse de 1.8% à cause des augmentations de 11.2% des prix des produits d'aluminium et 11.5% des prix des autres produits de métaux non ferreux. Cependant le recul de 4.3% de l'indice des prix des produits de fer et d'acier a modéré la hausse globale.

L'indice des sciages, des produits de scierie et divers a diminué de 1.0% en octobre. Les prix du bois de construction de résineux étaient en baisse dans toutes les régions à l'exception du littoral de la Colombie- Britannique où les prix ont augmenté de 0.6%. L'indice des sciages, des produits de scierie et divers dépassait de 12.8% son niveau d'octobre 1991, les prix du bois de construction de résineux ayant grimpé à eux seuls de 22.2%

Highlights

Raw Materials Price Index

Preliminary data for October 1992 indicate a Raw Materials Price Index (RMPI, 1986 = 100) of 110.0, up 1.1% from the September revised level of 108.8. Major contributors to the increase in the overall index were higher prices for mineral fuels (4.1%) and animals and animal products (1.7%). Decreases in the indexes for non-ferrous metals (-3.5%) and vegetable products (-1.7%) were offsetting factors. The RMPI excluding mineral fuels was down 0.2% from the previous month.

The RMPI increased 7.4% over the October 1991 figure, primarily due to higher prices for mineral fuels (8.1%) and wood (17.2%). The only component that declined over the past year was the non-metallic minerals index, which was down 1.8%. The RMPI excluding mineral fuels rose 7.1% over the same period.

The mineral fuels index increased 4.1% in October 1992 due to a 4.3% rise in the index for crude mineral oils. The mineral fuels index rose 8.1% over the past 12 months, primarily because of higher crude mineral oil prices (8.3%). Natural gas prices declined 2.9% over the same period.

The animals and animal products index increased 1.7% in October following four consecutive monthly decreases. The major factors in this increase were cattle for slaughter (3.4%), hogs for slaughter (2.5%), and fish (4.4%). Compared to October 1991, the animals and animal products index was 3.3% higher, mainly due to the significant increase in the cattle for slaughter index (13.1%) and the more moderate rise in the hogs for slaughter index (2.0%). This upward movement was offset by the 5.2% decline in the fish index.

The non-ferrous metals index dropped 3.5%, mainly reflecting lower prices for copper concentrates (-5.0%), zinc concentrates (-13.3%), and aluminum materials (-2.7%). These declines were partially offset by the 1.3% increase in the gold index. From October 1991 the non-ferrous metals index rose 7.4% due to higher prices for aluminum materials (14.6%), copper concentrates (4.0%), zinc concentrates (22.2%), and gold (5.4%).

In October 1992 the vegetable products index decreased 1.7%, reflecting decreases in the prices of tobacco (-6.9%), rapeseed (-6.4%), corn (-5.0%) and wheat (-2.4%). The cocoa, coffee and tea index moderated the downward trend with an 11.2% increase. The vegetable products index rose 3.1% over the last 12 months, mainly because of rising prices for oilseeds (11.8%) and wheat (11.4%). Substantially lower prices for potatoes (-20.7%) and cocoa, coffee and tea (-11.6%) were offsetting factors.

Two indexes that showed little change in the month had changed significantly over the past year. The wood index increased 17.2% mainly due to major increases in log and bolt prices (25.6%); and the ferrous materials index rose 6.9% as a result of higher iron ore prices (8.0%).

Faits saillants

Indice des prix des matières brutes

Les chiffres préliminaires du mois d'octobre 1992 indiquent que l'indice des prix des matières brutes (IPMB, 1986 = 100) s'est accrû de 1.1% par rapport au niveau révisé de septembre (108.8), pour s'établir à 110.0. Cette hausse de l'indice global a été principalement due à une majoration des prix des combustibles minéraux (4.1%) et des animaux et substances animales (1.7%). La tendance haussière a cependant été atténuée par les baisses affichées par l'indice des métaux non ferreux (-3.5%) et celui des substances végétales (-1.7%). L'IPMB sans la composante des combustibles minéraux a quant à lui enregistré une diminution de 0.2% au cours du dernier mois.

Par rapport au mois d'octobre 1991, l'IPMB a progressé de 7.4%, principalement en raison des augmentations de prix rencontrées chez les combustibles minéraux (8.1%) et le bois (17.2%). La seule composante ayant connu un recul au cours de la dernière année a été l'indice des minéraux non métalliques, avec une baisse de 1.8% dans ses prix. Quant à l'IPMB sans la composante des combustibles minéraux, il a crû de 7.1% durant cette même période.

L'indice des combustibles minéraux s'est inscrit à la hausse en octobre 1992 (4.1%), une augmentation dictée par celle accusée par les huiles minérales brutes (4.3%). Comparativement à l'an dernier, l'indice des combustibles minéraux s'est élevé de 8.1%, particulièrement en raison de la majoration des prix des huiles minérales brutes (8.3%). Le gaz naturel a, quant à lui, affiché une diminution de prix de 2.9% au cours des douze derniers mois.

En ce qui a trait à l'indice des animaux et substances animales, il a enregistré une hausse de 1.7% ce mois-ci, et ce après quatre mois de baisses consécutives. Les principaux indices qui en sont responsables sont ceux des bovins envoyés à l'abattage (3.4%), des porcs destinés à l'abattage (2.5%) et des poissons (4.4%). Au cours de la dernière année, l'indice des animaux et substances animales a augmenté de 3.3%, en raison du bond enregistré par l'indice des bovins envoyés à l'abattage (13.1%), et de la hausse plus modérée de celui des porcs envoyés à l'abattage (2.0%). L'indice des poissons est venu modérer ces augmentations en s'abaissant de 5.2%.

L'indice des métaux non ferreux a, pour sa part, chuté de 3.5%, un recul majoritairement causé par la baisse des prix des concentrés de cuivre (-5.0%) et de zinc (-13.3%), et des matériaux d'aluminium (-2.7%). L'indice de l'or est venu atténuer ces réductions de prix en se haussant de 1.3%. Par rapport à octobre 1991, l'indice des métaux non ferreux a progressé de 7.4%; les composantes venant appuyer cette croissance ont été les matériaux d'aluminium (14.6%),les concentrés de cuivre (4.0%) et de zinc (22.2%), de même que l'or (5.4%).

Quant à l'indice des substances végétales, il a accusé un recul de 1.7% en octobre 1992, lequel étant attribuable aux réductions rencontrées par l'indice du tabac (-6.9%), de même que par celui du colsa (-6.4%), du maïs (-5.0) et du blé (-2.4%). L'indice du cacao, café et thé a, pour sa part, atténué la tendance avec une hausse de 11.2% dans ses prix. Les douze derniers mois ont vu s'accroître l'indice des substances végétales de 3.1%, une hausse principalement due aux majorations de prix affichées par les oléagineux (11.8%) et le blé (11.4%). Le mouvement haussier général a cependant été modéré par les baisses de prix substantielles enregistrées par les pommes de terre fraîches (- 20.7%) et le cacao, café et thé (-11.6%).

Deux indices se sont particulièrement démarqués de par leur variation au cours de la dernière année. Il s'agit de l'indice du bois (17.2%), dont la forte croissance est directement attribuable à celle accusée par les prix des billes et billots (25.6%), et de l'indice des matières ferreuses (6.9%), dont la hausse plus modérée est survenue par le biais de celle des prix des minéraux de fer (8.0%).

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé.
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision.
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

THE MARKET RESEARCH HANDBOOK 1992

The fastest way to get off to a good start !

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The **Market Research Handbook 1992** can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them.
It helps you to identify, define and locate your target markets.

Looking for . . .

. . . socio-economic and demographic profiles of 45 urban areas?

. . . revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook 1992** has it all . . . and more. It provides information on:

- personal spending
- size and composition of households
- wages and salaries
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook 1992** close at hand for easy reference.

The **Market Research Handbook 1992** (Cat. no. 63-224) is $94 (plus 7 % GST) in Canada, US$113 in the United States and US$132 in other countries.

To order, write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

For faster service fax your order to 1-613-951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1992

Pour partir du bon pied !

Des séances de remue-méninges jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil statistique des études de marché 1992** peut vous faciliter les choix avant que vous n'engagiez plus de temps et de ressource à l'élaboration de votre stratég

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises qui les servent. Il vous aide à définir et situer vos marchés cibles.

Vous cherchez . . .

. . . des profils socio-économiques et démographiques de 45 régions urbaines ?

. . . des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le **Recueil** contient tout cela . . . et plus encore :

- dépenses personnelles
- taille et composition des ménages
- traitements et salaires
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché 1992** (n° 63-224 au catalogue) coûte 94 $ (TPS de 7% en sus) au Canada, 113 $ US aux États-Unis et 132 $ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

Statistique Canada Statistics Canada

Canada

ARE YOU CONCERNED ABOUT CANADA'S COMPETITIVENESS IN THE GLOBAL MARKETPLACE?

You are not alone. Goods, money, information and technology are flowing across borders at an unprecedented pace. In order for us to be key players, we must keep informed. We must know:

- how our products are sold to other countries
- how to assess the foreign competition

Statistics Canada offers you five publications on the subject that can broaden your understanding of Canada's dealings with other countries.

CANADA'S INTERNATIONAL INVESTMENT POSITION

This publication gives a snapshot of Canada's international financial position, showing who's investing in what, in Canada and abroad at year end. Especially valuable analytical information is also provided on the relative position of both Canadian and foreign ownership and control of capital employed in Canada.

PRICE: $37
(Cat. No. 67 -202)

SECURITY TRANSACTIONS WITH NON-RESIDENTS

Find out who's trading what on security markets with this monthly publication which presents Canada's trading in stocks, bonds and money market paper with non-residents. The December issue includes a description of sources and methods as well as complete data for the year.

PRICE: $158
(Cat. No. 67 -002)

CANADA'S BALANCE OF INTERNATIONAL PAYMENTS (HISTORICAL STATISTICS 1926 TO 1990)

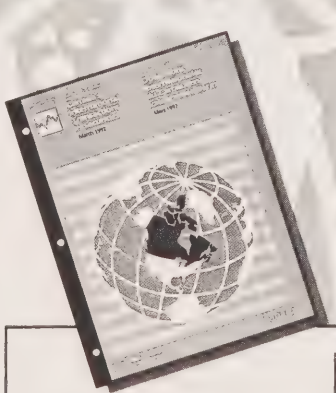
For the first time, balance of payments data are available in the same format from 1926 to 1990, in one publication. You get:

- all the historical data in one place!
- summary tables for the current and capital accounts.
- selected additional data such as exchange rates and gross domestic product.

...all in one compact, well-presented publication!

PRICE: $50
(Cat. No. 67-508)

CANADA'S INTERNATIONAL TRANSACTIONS IN SERVICES



This annual report looks at our international pattern of trade in services: travel, freight, business services, government and other services.

PRICE: $32
(Cat. No. 67 -203)

CANADA'S BALANCE OF INTERNATIONAL PAYMENTS

Need a complete picture of Canada's international transactions? Then refer to this quarterly publication which outlines merchandise, services, investment income and transfers of the current account; and the financial transactions of the capital account. Transactions are shown for six geographical areas.

PRICE: $110
(Cat. No. 67 -001)

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, call toll-free and use VISA or MasterCard

LA SITUATION CONCURRENTIELLE DU CANADA SUR LES MARCHÉS INTERNATIONAUX VOUS PRÉOCCUPE-T-ELLE?

Vous n'êtes pas les seuls. Les produits, l'argent, l'information et la technologie franchissent les frontières à un rythme encore jamais vu. Si nous voulons faire partie des joueurs clés, nous devons être informés sur :

- comment nos produits sont vendus aux autres pays
- comment évaluer la place du Canada dans la concurrence étrangère

À ce sujet, Statistique Canada met à votre disposition cinq publications qui peuvent élargir votre compréhension des relations économiques du Canada avec les autres pays.

BILAN DES INVESTISSEMENTS INTERNATIONAUX DU CANADA

Cette publication donne un instantané de la position financière internationale du Canada et montre qui investit dans quoi au Canada et à l'étranger, en fin d'année. S'y retrouvent aussi des renseignements sur l'importance de la propriété et du contrôle canadiens et étrangers du capital employé au Canada.

PRIX: 37 $
(N°. 67 -202 au cat.)

BALANCE DES PAIEMENTS INTERNATIONAUX DU CANADA (STATISTIQUES HISTORIQUES 1926 À 1990)

Pour la première fois, les données de la balance des paiements sont présentées sous le même format de 1926 à 1990 dans une seule publication.Vous y trouverez :

- toutes les données historiques dans le même volume!
- des tableaux sommaires pour le compte courant et le compte de capital
- des données supplémentaires choisies, telles que les taux de change et le produit intérieur brut

...et tout ceci, dans une publication unique, compacte et bien présentée!

PRIX: 50 $
(N°. 67-508 au cat.)

Pour commander, prière d'écrire au Service de la Vente des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le centre régional de consultation de Statistique Canada le plus proche (la liste apparaît dans cette publication).

Pour commander plus rapidement, utilisez votre carte VISA ou MasterCard et appelez sans frais au

1-800-267-6677

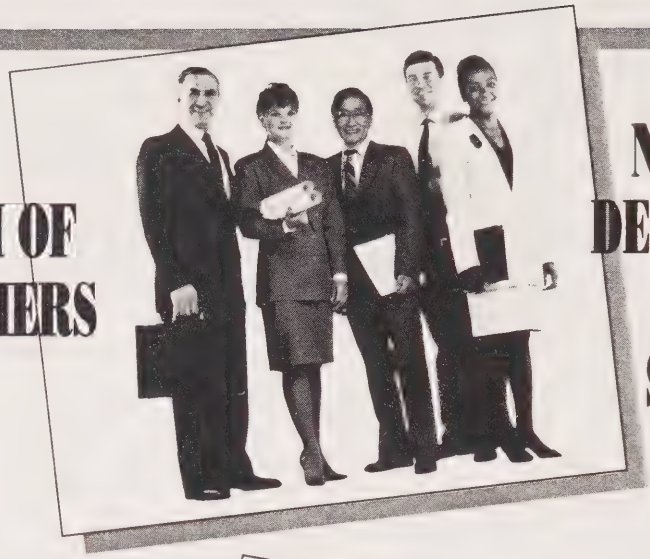
LA BALANCE DES PAIEMENT INTERNATIONAUX DU CANADA

Vous voulez une vue complète des opérations internationales du Canada? Alors consultez cette publication trimestrielle qui retrace les marchandises, les services, les revenus de placements et les transferts au compte courant et les opérations financières au compte de capital. Les opérations sont classées selon six régions géographiques.

PRIX: 110 $
(N°. 67 -001 au cat.)

LES TRANSACTIONS INTERNATIONALES DE SERVICES DU CANADA

Cette publication annuelle examine nos pratiques internationales en ce qui concerne les services : voyages, transports, services commerciaux, services gouvernementaux et autres.



PRIX: 32 $
(N°. 67 -203 au cat.)

OPÉRATIONS EN VALEURS MOBILIERES AVEC LES NON-RÉSIDENTS

Sachez qui achète quoi sur les marchés des valeurs mobilières grâce à cette publication mensuelle qui présente le commerce du Canada en actions, obligations et effets du marché monétaire avec les non-résidents. Le numéro de décembre non seulement présente les données complètes de l'année, mais encore une description des sources et des néthodes.

PRIX: 158 $
(N°. 67 -002 au cat.)

HIRE OUR TEAM OF RESEARCHERS FOR $53 A YEAR

NOTRE ÉQUIPE DE CHERCHEURS EST À VOTRE SERVICE POUR 53 $ PAR ANNÉE

Subscribing to **Perspectives on Labour and Income** is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But **Perspectives** is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analysing the statistics to bring you simple, clear summaries of where the labour market and income distributions are headed.

Our team of experts is working to bring you the latest labour and income data. Each quarterly issue has:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research projects
- information on new survey results

As a special bonus, twice a year you will also receive a Labour Market Review, giving you up-to-the-minute analysis and data of how the labour market has performed over the last six months or year.

And all for only $53.00.

Thousands of Canadian professionals turn to **Perspectives** to discover new trends in labour and income and to stay up-to-date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find **Perspectives** indispensable. GUARANTEED. If you aren't convinced after reading your first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to **Perspectives** today.

S'abonner à **L'emploi et le revenue en perspective**, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les tendances actuelles du marché du travail et de la répartition des revenus.

Notre équipe de spécialistes travaille activement afin de mettre à votre disposition des données actuelles sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez

- des articles de fond rédigés par des spécialistes de l'emploi et du revenu;
- plus de 50 indicateurs clés de l'emploi et du revenu;
- un aperçu des projets de recherche en cours;
- de l'information provenant des nouvelles enquêtes.

En plus, vous recevrez une revue du marché du travail, un supplément publié deux fois par année.

Tout cela pour 53 $ seulement!

Des milliers de professionnels au Canada consultent **Perspective** pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que **L'emploi et le revenu en perspective** deviendra pour vous un outil indispensable. Nous le garantissons. Si vous n'êtes pas satisfaits après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à **Perspective** dès aujourd'hui.

ORDER NOW!
For only $53 (plus $3.71 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US$64 for U.S. customers and US$74 for customers outside North America.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

– nil or zero.

-- amount too small to be expressed.

p preliminary figures.

r revised figures.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division de la commercialisation, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
♾

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Industrial Product Price Index

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) rose 0.2% to 110.6 in November 1992. Fifteen of the 21 major groups of products registered increases in their indexes, while three decreased, and three remained unchanged. Significant price increases occurred in lumber, sawmill and other wood products (2.6%) and in autos, trucks, and other transportation equipment (0.7%). Tobacco products also increased by 2.7%. There was a significant decline in primary metal product prices (-2.5%). The US dollar continued to strengthen in value against the Canadian dollar in November, rising 1.1%, and was an important contributing factor in the rise of the IPPI by increasing the prices of export goods denominated in US dollars.

Compared to November 1991, the IPPI was 3.1% higher. The strength of the American dollar, which is 11.8% higher against the Canadian dollar than a year ago, contributed to this twelve month increase. The most important increases over the last twelve months were in autos, trucks and other transport equipment (7.8%); lumber, sawmill and other wood products (14.2%); paper and paper products (4.9%); and meat, fish and dairy products (3.8%). The five declines were all less than 1.0%, the most important being rubber, leather, and plastic fabricated products (-0.9%). If petroleum and coal products are excluded, the twelve month change for the index was 3.2%.

This is the sixth consecutive month that a year to year increase has been recorded for the IPPI index. Each increase has been larger than the previous month's increase. The intermediate goods index has been recording year to year price increases for four consecutive months, each larger than the previous month increase. Finished goods have been recording year to year increases for ten consecutive months, and for four consecutive months the increases have been getting larger.

The first stage intermediate goods index registered a decline in November, -1.4%, but the second stage intermediate goods index continued to rise, increasing 0.5%. Finished foods and feeds, capital equipment, and other finished goods all showed price increases, 0.2%, 0.4%, and 0.5% respectively. Compared to a year ago, all five categories of industrial products showed higher prices. The largest increase was in capital equipment, 4.7%, and the smallest was in finished foods and feeds, 1.7%.

The lumber, sawmill and other wood products index showed a 2.6% increase in November, as softwood lumber prices rose 4.8%. Softwood prices were higher right across the country. The veneer and plywood area was also very active, with a 1.6% increase in the index as softwood veneer and plywood prices rose 2.4%. Contributing to these price increases were the declining Canadian dollar and a strong export market in the United States. The lumber, sawmill, and other wood products index stood 14.2% higher than a year ago, with softwood lumber and ties prices showing a 24.6% increase.

The autos, trucks and other transportation equipment index rose 0.7% in November as passenger automobiles prices rose 0.9%. Domestic automobiles recorded a 0.1% increase in prices while export automobiles showed a 1.1% price increase, largely due to the increase in the value of the American dollar. The overall price index stood 7.8% higher than a year ago, with domestic car prices -0.3% lower and export automobiles prices 13.1% higher.

The primary metal products index showed a decline of 2.5%, due to declines in the prices of non-ferrous metal products. The largest decline was in nickel product prices (-14.6%), but there were also declines in both aluminum product prices (-3.1%) and copper and copper alloy products prices (-3.3%). Compared to November 1991, the primary metal products index was 0.2% lower in November 1992, due to declines in iron and steel product prices (-3.5%) and in nickel product prices (-12.0%)

Faits saillants

Indice des prix des produits industriels

D'après les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a progressé de 0.2% pour s'établir à 110.6 en novembre 1992 Sur vingt et un indices de grands groupes de produits, quinze ont augmenté, trois ont diminué et les trois autres sont restés inchangés. De fortes majorations ont été observées pour les sciages, produits de scierie et divers (2.6%) de même que pour les voitures, les camions et le matériel de transport (0.7%). Il y a également eu hausse de 2.7% des produits du tabac. Les prix des produits métalliques primaires ont fortement diminué (-2.5%) L'appréciation du dollar américain par rapport au dollar canadien s'est poursuivie en novembre avec un gain de 1.1% ce qui, en faisant augmenter la valeur des biens d'exportation exprimée en dollars américains, a grandement contribué à la montée de l'IPPI.

Par rapport à novembre 1991, l'IPPI a progressé de 3.1%. La vigueur du dollar américain, qui a augmenté de 11.8% par rapport au dollar canadien depuis un an, a été un facteur de cette hausse sur douze mois. Les plus importantes majorations au cours des douze derniers mois ont été celles des voitures, des camions et du matériel de transport (7.8%), des sciages, produits de scierie et divers (14.2%), du papier et des produits connexes (4.9%) et de la viande, du poisson et des produits laitiers (3.8%). Les cinq baisses ont toutes été inférieures à 1.0%, la plus importante ayant été observée pour les produits en caoutchouc, en cuir et en matière plastique (-0.9%). Sans les produits du pétrole et du charbon, la variation sur douze mois de l'indice a été de 3.2%.

La dernière augmentation d'une année à l'autre de l'IPPI est la sixième en autant de mois. Chacune des augmentations successives était supérieure à celle du mois précédent. L'indice des produits semi-finis inscrit des hausses d'une année à l'autre depuis quatre mois, chacune supérieure à la précédente. Les prix des produits finis sont en hausse d'une année à l'autre depuis dix mois sans interruption, et une accélération de la progression est observée depuis quatre mois.

L'indice des produits semi-finis de première étape a régressé en novembre (-1.4%) mais celui des produits semi-finis de deuxième étape a encore progressé, cette fois de 0.5%. Les prix des aliments de consommation et aliments pour animaux, ceux du matériel capitalisé et ceux des autres produits finis ont tous augmenté, de 0.2%, 0.4% et 0.5% respectivement. Par rapport à il y a un an, les cinq catégories de produits industriels affichent des prix plus élevés. Le matériel capitalisé vient en tête, avec un accroissement de 4.7%, et les aliments de consommation et aliments pour animaux ferment la marche, avec une progression de 1.7%.

L'indice des sciages, produits de scierie et divers a augmenté de 2.6% en novembre, les prix du bois de construction de résineux étant en hausse de 4.8%. Partout au pays, les prix du bois de résineux sont plus élevés. De plus, l'indice des placages et des contreplaqués s'est accru de 1.6% sous l'effet du relèvement de 2.4% des prix du contreplaqué de résineux. La baisse du dollar canadien et la vigueur des exportations vers les États-Unis ont été des facteurs de ces hausses de prix. L'indice des sciages, produits de scierie et divers dépasse de 14.2% son niveau d'il y a un an, les prix du bois de construction de résineux ayant grimpé de 24.6%.

L'indice des voitures, des camions et du matériel de transport a grimpé de 0.7% en novembre, les prix des automobiles ayant augmenté de 0.9%. Les prix des automobiles pour le marché intérieur ont été relevés de 0.1% et ceux des automobiles exportées, de 1.1% en raison surtout de l'appréciation du dollar américain. L'indice global dépassait de 7.8% son niveau d'il y a un an, les prix des automobiles pour le marché intérieur étant inférieurs de 0.3% et ceux des automobiles exportées étant supérieurs de 13.1%

L'indice des produits métalliques primaires a régressé de 2.5% en raison de la baisse des prix des produits de métaux non ferreux. Le recul le plus important a été celui des prix des produits du nickel (-14.6%) mais les prix des produits de l'aluminium ont aussi diminué (-3.1%) de même que ceux des produits du cuivre et d'alliage de cuivre (-3.3%). Par rapport à novembre 1991, l'indice des produits métalliques primaires était en baisse de 0.2% en novembre 1992 en raison du déclin des prix des produits du fer et de l'acier (-3.5%) et des produits du nickel (-12.0%).

Highlights

Raw Materials Price Index

The Raw Materials Price Index (RMPI, 1986 = 100) fell 0.2% in November 1992, primarily owing to decreases in the mineral fuels (-0.7%) and non-ferrous metals (-3.5%) indexes. This downward movement was offset by increases in the indexes for vegetable products (2.5%), wood (1.0%), and animals and animal products (0.5%). The RMPI excluding mineral fuels rose 0.2% over the previous month.

With six of the seven RMPI components posting higher figures, the overall index was up 7.4% from November 1991. The largest increases were in mineral fuels (4.2%), wood (19.3%), and animals and animal products (6.7%). The RMPI excluding mineral fuels increased 9.1% over the last twelve months.

The mineral fuels index was down slightly (-0.7%) in November, mainly because of a decrease in the crude mineral oils index (-0.9%). Since November 1991, however, the mineral fuels index has risen 4.2% as a direct result of the 4.1% increase in crude mineral oil prices.

The non-ferrous metals index was down 3.5%, largely owing to lower prices for concentrates of copper (-4.2%), nickel (-14.7%), and zinc (-7.8%). Over the past year the non-ferrous metals index rose 2.7%. A major factor in this rise was the 19.3% increase in the radioactive concentrates index. Offsetting this were declining prices for nickel concentrates (-15.1%) and copper concentrates (-1.8%).

The vegetable products index rose 2.5% between October and November 1992, reflecting higher prices for wheat (5.7%), rapeseed (7.1%) and cocoa, coffee and tea (8.6%). The vegetable products index grew, up 9.7% over the past twelve months, mainly due to increases in the indexes for oilseeds (20.6%), wheat (13.1%), potatoes (27.2%) and unrefined sugar (18.3%).

The November 1992 wood index was up slightly (1.0%) following a 1.1% increase in log and bolt prices, the twelfth consecutive monthly increase for this component. The pulpwood index also contributed to this upward movement, rising 0.7% over the month. The wood index was 19.3% higher than the November 1991 level because of major increases in log and bolt prices (27.7%) and a small rise in the pulpwood index (0.8%).

The animals and animal products index rose 0.5% over the past month, mainly owing to increases of 1.4% in the cattle for slaughter index and 1.7% in the hogs for slaughter index. Over the past year the animals and animal products index increased 6.7%, primarily as a result of higher prices for cattle for slaughter (19.3%) and hogs for slaughter (20.0%). These increases were offset somewhat by the fish index, which declined 6.5%.

Despite posting only a very slight change in November 1992, the ferrous materials index was up 7.1% from November 1991 mainly because of a 9.0% increase in the iron ore index.

Faits saillants

Indice des prix des matières brutes

Au cours du mois de novembre 1992, l'indice des prix des matières brutes (IPMB, 1986 = 100) a diminué de 0.2%, une baisse particulièrement attribuable à celles enregistrées par l'indice des combustibles minéraux (-0.7%) et l'indice des métaux non ferreux (-3.5%). Ces diminutions de prix ont cependant été atténuées par les hausses rencontrées par l'indice des substances végétales (2.5%), l'indice du bois (1.0%), de même que par l'indice des animaux et substances animales (0.5%). L'IPMB sans la composante des combustibles minéraux a pour sa part enregistré une hausse de 0.2% au cours du dernier mois.

Comparativement à l'an dernier, l'IPMB a progressé de 7.4%, majoritairement en raison des augmentations enregistrées par six des sept composantes de l'indice global. Les indices ayant accusé les hausses les plus significatives sont les combustibles minéraux (4.2%), le bois (19.3%) et les animaux et substances animales (6.7%). L'IPMB sans la composante des combustibles minéraux a quant à lui augmenté de 9.1% au cours de l'année.

L'indice des combustibles minéraux s'est légèrement replié au cours du mois de novembre (-0.7%), principalement en raison du recul enregistré par l'indice des huiles minérales brutes (-0.9%). Par rapport à l'an dernier, l'indice des combustibles minéraux s'est cependant accrû de 4.2%, une hausse directement dictée par l'augmentation de prix de 4.1% accusée par les huiles minérales brutes.

Pour sa part, l'indice des métaux non ferreux s'est abaissé de 3.5%, particulièrement en raison des baisses de prix rencontrées par les concentrés de cuivre (-4.2%), de nickel (-14.7%) et de zinc (-7.8%). Au cours de la dernière année, l'indice des métaux non ferreux a connu une hausse de 2.7%; une des composantes ayant le plus contribué à ce mouvement haussier est l'indice des concentrés radio-actifs, affichant un bond de 19.3%. Les baisses de prix enregistrées par les concentrés de nickel (-15.1%) et de cuivre (-1.8%) ont cependant atténué cette forte augmentation.

Quant à l'indice des substances végétales, il s'est accrû de 2.5% entre octobre et novembre 1992, une hausse dictée par celles rencontrées chez les indices du blé (5.7%), du colza (7.1%) et du cacao, café et thé (8.6%). Les douze derniers mois ont pour leur part vu les prix des substances végétales se majorer de 9.7%, principalement en raison des augmentations affichées par l'indice des oléagineux (20.6%), du blé (13.1%), des pommes de terre fraîches (27.2%) et du sucre non raffiné (18.3%).

L'indice du bois a accusé une légère hausse de 1.0% en novembre 1992, laquelle étant attribuable à l'augmentation de l'indice des billes et billots (1.1%), la douzième en autant de mois consécutifs. L'indice du bois à pâte de résineux a lui aussi contribué à l'augmentation générale en se majorant de 0.7%. Par rapport à novembre 1991, l'indice du bois a grimpé de 19.3%, une hausse due au bond de 27.7% rencontré par les prix des billes et billots, de même que d'une majoration des prix du bois à pâte de résineux de 0.8%.

En ce qui a trait à l'indice des animaux et substances animales, il s'est accrû de 0.5% au cours du dernier mois, principalement en raison des augmentations respectives de 1.4% et 1.7% affichées par les prix des bovins envoyés à l'abattage et des porcs destinés à l'abattage. Comparativement à l'an dernier, l'indice des animaux et substances animales a connu une majoration de 6.7%, une hausse due, en grande partie, à celles enregistrées par les bovins envoyés à l'abattage (19.3%) et des porcs destinés à l'abattage (20.0%). L'indice du poisson a quant à lui modéré ces hausses de prix en s'abaissant de 6.5%.

Bien qu'il n'ait que très peu varié en novembre 1992, l'indice des matières ferreuses a progressé de 7.1% par rapport au mois de novembre 1991, une hausse fortement attribuable à celle accusée par l'indice des minéraux de fer (9.0%).

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé.
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agregats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

TABLEAU 4. Indices des prix des produits industriels par étape de transformation

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision.
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

TABLE 6. Raw Materials Price Indexes

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
$\sum_i$	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
$\sum_i$	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

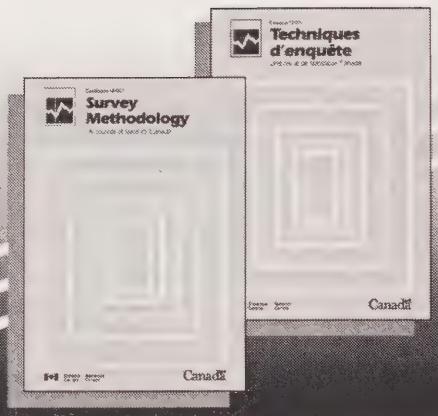
The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.



Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

Survey Methodology

A Journal of Statistical Development and Applications

Techniques d'enquête

Une revue des méthodes et des applications statistiques

Survey Methodology is dedicated to the theory and practice of survey taking. Published twice a year, this Statistics Canada journal provides a unique outlet for research and scholarship on topics that span the survey process from data collection, through analysis to evaluation.

Each issue of ***Survey Methodology*** presents a carefully selected collection of articles that combine solid insights with readability. Special sections with forward-looking articles examine emerging issues in the field and alert subscribers to the best current survey techniques. Recent special topics have included:

- Census Undercount Measurement Methods and Issues
- New Approaches to Data Collection and Capture
- Time Series Methods in Surveys
- History and Emerging Issues in Censuses and Surveys
- Data Analysis
- Statistical Uses of Administrative Data

Survey Methodology thrives on the contributions of experts from Canada and around the world. You can count on articles and overviews that are authoritative and complete.

Survey Methodology (Cat. no. 12-001) costs $35 in Canada, US $ 42 in the United States, and US $ 49 in other countries. To order, write to:

Publication Sales

Techniques d'enquête est une revue de Statistique Canada publiée deux fois l'an et consacrée aux aspects théoriques et pratiques des enquêtes. Aux fins de la recherche et des études, c'est une source d'information unique sur les diverses facettes des enquêtes comme la collecte, l'analyse et l'évaluation des données.

Chaque numéro de ***Techniques d'enquête*** présente un choix judicieux d'articles bien structurés et agréables à lire. Dans des sections spéciales qui s'orientent vers l'avenir, on présente des articles sur l'évolution du domaine et on met le lecteur sur la piste des meilleures techniques d'enquête à l'heure actuelle. Au nombre des sujets parus récemment :

- Méthodes et questions concernant la mesure du sous-dénombrement du recensement
- Nouvelles approches pour la collecte et la saisie des
- Séries chronologiques dans les enquêtes
- Histoire et questions actuelles dans le domaine des recensements et des sondages
- Analyse de données
- Utilisations statistiques des données administratives

Techniques d'enquête réunit les contributions d'experts du pays et de la scène internationale, de manière à vous offrir un éventail d'articles et d'aperçus qui font autorité.

L'abonnement annuel à ***Techniques d'enquête*** (nº 12-001 au Catalogue) coûte 35 $ au Canada, 42 $ US aux États-Unis et 49 $ US dans les autres pays. Pour commander, écrivez à :

INTERESTED IN ACQUIRING A CANADIAN ORIGINAL?

Then ***Canadian Social Trends*** is the acquisition for you. A first on the Canadian scene, this journal is claiming international attention from the people who need to know more about the social issues and trends of this country.

Drawing on a wealth of statistics culled from hundreds of documents, ***Canadian Social Trends*** looks at Canadian population dynamics, crime, education, social security, health, housing, and more.

For social policy analysts, for trendwatchers on the government or business scene, for educators and students, ***Canadian Social Trends*** provides the information for an improved discussion and analysis of Canadian social issues.

Published four times a year, ***Canadian Social Trends*** also features the latest social indicators, as well as information about new products and services available from Statistics Canada.

VOUS DÉSIREZ FAIRE L'ACQUISITION D'UNE OEUVRE ORIGINALE ?

Alors ***Tendances sociales canadiennes*** est la publication qu'il vous faut. Première en son genre sur la scène canadienne, cette revue retient l'attention des gens d'ici et d'ailleurs qui désirent en savoir plus sur les questions sociales de l'heure au pays.

À l'aide d'abondantes statistiques extraites de nombreux documents, ***Tendances sociales canadiennes*** brosse le tableau de la dynamique de la population canadienne, de la criminalité, de l'éducation, de la sécurité sociale, de la santé, de l'habitation et de plusieurs autres sujets.

Que ce soit pour les analystes de la politique sociale, les analystes des tendances oeuvrant au sein des administrations publiques et du monde des affaires, les enseignants ou encore les étudiants, ***Tendances sociales canadiennes*** dégage l'information nécessaire à des discussions et des analyses approfondies relativement aux questions sociales.

Tendances sociales canadiennes présente également les plus récents indicateurs sociaux de même que des renseignements relatifs aux produits et services qu'offre Statistique Canada.

CANADIAN SOCIAL TRENDS

(Catalogue No. 11-008E) is $34 annually in Canada, US$40 in the United States and US$48 in other countries.

To order, write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

JOIN THE *Celebration*

WITH THE MOST USEFUL AND ATTRACTIVE CANADA YEAR BOOK EVER PUBLISHED.

On the occasion of the nation's 125th anniversary of Confederation, the **1992 Canada Year Book** takes a unique look at the fascinating highlights in the development of Canada since 1867.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the **1992 Canada Year Book** is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos
- historical perspectives on Canada's past
- 22 chapters, 607 pages bound in deluxe hard cover

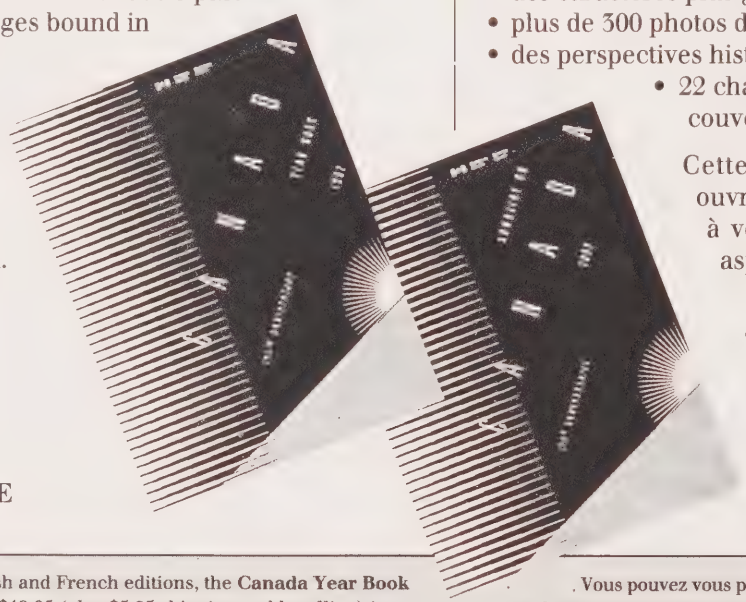
Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

- THE LAND
- THE PEOPLE
- THE NATION
- THE ECONOMY
- ARTS AND LEISURE

PARTICIPEZ *à la fête*

EN VOUS PROCURANT L'ANNUAIRE DU CANADA LE PLUS UTILE ET LE PLUS ATTRAYANT JAMAIS PUBLIÉ.

L'Annuaire du Canada de 1992, qui marque le 125e anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.



Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
- 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
- LA POPULATION
- LA NATION
- L'ÉCONOMIE
- LES ARTS ET LES LOISIRS

Available in separate English and French editions, the **Canada Year Book** (Cat. No. 11-402E) sells for $49.95 (plus $5.05 shipping and handling) in Canada, US $60 in the United States, and US$70 in other countries (includes shipping and handling).

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, using your VISA or MasterCard, call toll-free 1-800-267-6677 or fax your order to (613) 951-1584. Please do not send confirmation.

Vous pouvez vous procurer **l'Annuaire du Canada** (no 11-402F au Catalogue), en version française ou anglaise, pour 49,95 $ (plus 5,05 $ pour frais d'expédition et de manutention) au Canada, 60 $ (devises américaines) aux États-Unis et 70 $ (devises américaines) dans les autres pays (frais d'expédition et de manutention compris).

Pour commander, prière d'écrire au Service des Ventes des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le Centre régional de consultation de Statistique Canada le plus près de chez vous (voir la liste qui figure dans la publication).

Pour accélérer les commandes, utilisez votre carte VISA ou MasterCard ou composez sans frais le 1-800-267-6677 (téléphone) ou le (613) 951-1584 (télécopieur). Veuillez ne pas envoyer de confirmation.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division de la commercialisation, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
∞

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Industrial Product Price Index

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) rose 0.4% to 111.0 in December 1992 from November's level of 110.6. Thirteen of the 21 major groups of products registered increases in their indices while four decreased and four did not change. The most significant increases were autos, trucks and other transport equipment (0.6%); lumber, sawmill and other wood products (2.2%); and primary metal products (0.5%). The largest decline occurred in paper and paper products, -0.3%.

During December, the value of the US dollar rose 1.1% against the Canadian dollar, raising the value of export prices denominated in American dollars. In December 1992, the American dollar was 11.8% higher against the Canadian dollar than in December 1991.

Compared to December 1991, the IPPI was 3.5% higher. The most important increases over the last twelve months were in autos, trucks, and other transport equipment (8.2%); and lumber, sawmill and other wood products (16.8%). Other increases of over 4% were: tobacco and tobacco products (4.8%); paper and paper products (4.3%); and meat, fish, and dairy products (4.2%). The three declines were all under -1.0%, with the largest being rubber, leather, and plastic fabricated products at -0.7%. If petroleum and coal products are excluded, the 12-month change for the index was 3.5%.

Although the second stage intermediate goods index registered an increase of 0.4% over November, first stage intermediate goods declined -0.2%. Among finished goods categories, the finished foods and feeds index rose 0.1% while the capital equipment price index and the all other finished goods indices both rose 0.4% in price. All five of these indices were higher than a year earlier, ranging from finished foods and feeds at 1.7% to capital equipment at 5.1%. Throughout 1992, the year-to-year price changes both for second stage intermediate goods and for finished goods have tended to rise. These rose from -3.6% and -0.4% respectively in January to 3.4% and 3.8% respectively in December. The price index for second stage intermediate goods, however, remains below its level in January 1991.

The lumber, sawmill and other wood products index showed a 2.2% increase in December and stood 16.8% higher than in last December. Softwood prices continue to rise, particularly in Central Canada and the Prairies. A significant role in the year-to-year price increase was played by the increase in the value of the American dollar.

The autos, trucks and other transportation equipment price index rose 0.6% in December and stood 8.2% higher than a year ago. These increases were primarily due to the increase in the price of exports. There were also smaller price increases on domestic vehicles on a year-to-year basis. The December price index for domestic automobiles shows no increase over November and a 2.8% increase over December 1991, while for exported automobiles the corresponding figures are 1.1% and 13.1%. The situation for trucks was basically similar. For domestic trucks there was a 0.5% decline in prices over November but prices were 5.0% higher than in December 1991, while for trucks for export the corresponding figures were a 1.0% increase and a 14.4% increase.

The primary metal products index increased by 0.5% in December and also stood 0.5% higher than a year ago. Copper, aluminum, and zinc provided the upward pressure, but their effect was greatly reduced by the fall in nickel prices, which were 6.5% lower than in November and 16.9% lower than in December 1991. Compared to a year ago, iron and steel products also provided downward pressure, being 3.6% lower than in December 1991

Faits saillants

Indice des prix des produits industriels

D'après les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a progressé de 0.4% pour s'établir à 111.0 en décembre 1992, alors qu'il se fixait à 110.6 en novembre. Sur vingt et un indices de grands groupes de produits, treize ont augmenté, quatre ont diminué et les quatre autres sont restés inchangés. Les principales hausses ont été observées pour les voitures, les camions et le matériel de transport (0.6%); les sciages, produits de scierie et divers (2.2%); et les produits métalliques primaires (0.5%). La principale baisse (-0.3%) était celle des prix du papier et des produits connexes.

En décembre 1992, le dollar américain s'est apprécié de 1.1% par rapport au dollar canadien, d'où l'accroissement des prix à l'exportation exprimée en dollars américains. Comparativement à décembre 1991, le dollar américain était 11.8% plus élevé que le dollar canadien.

Par rapport à décembre 1991, l'IPPI a progressé de 3.5%. Les principales hausses survenues pendant les douze mois étaient celles des voitures, des camions et du matériel de transport (8.2%); et des sciages, produits de scierie et divers (16.8%). On a aussi observé des hausses supérieures à 4% pour le tabac et les produits du tabac (4.8%); le papier et les produits connexes (4.3%); et la viande, le poisson et les produits laitiers (4.2%). Les trois baisses étaient toutes inférieures à -1.0% et la principale concernait les produits en caoutchouc, en cuir et en matière plastique (-0.7%). Sans les produits du pétrole et du charbon, la variation sur douze mois de l'indice a été de 3.5%

L'indice des produits semi-finis de deuxième étape a progressé de 0.4% par rapport à novembre, tandis que celui des produits semi-finis de première étape a reculé de 0.2%. Au chapitre des produits finis, les prix des aliments de consommation et aliments pour animaux ont grimpé de 0.1% et ceux du matériel capitalisé et des autres produits finis ont monté de 0.4%. Les cinq catégories de produits industriels affichaient des prix plus élevés qu'un an plus tôt. Le matériel capitalisé venait en tête, avec une hausse de 5.1%, et les aliments de consommation et aliments pour animaux fermaient la marche, avec une augmentation de 1.7%. En 1992, le changement annuel en prix pour les produits semi-finis de deuxième étape et les produits finis ont eu une tendance à la hausse. Les changements annuels respectifs ont progressé de -3.6% et -0.4% en janvier 1992 à 3.4% et 3.8% en décembre 1992. Cependant, l'indice des prix pour les produits semi-finis de deuxième étape est resté en dessous de son niveau de janvier 1991.

L'indice des sciages, produits de scierie et divers a avancé de 2.2% en décembre et dépassait de 16.8% son niveau d'il y a un an. Les prix du bois de résineux ont continué leur montée, surtout au Canada central et dans les Prairies. Les hausses de prix ont été renforcées par l'appréciation du dollar américain ce qui a été déterminant dans la progression des prix d'une année à l'autre.

L'indice des voitures, des camions et du matériel de transport a progressé de 0.6% en décembre et dépassait de 8.2% son niveau d'un an plus tôt. Les hausses étaient dues surtout à l'accroissement des prix à l'exportation entraîné par l'appréciation du dollar américain. En décembre 1992, l'indice des prix des automobiles domestiques était le même qu'en novembre 1992 mais était 2.8% plus haut qu'en décembre 1991, alors que les indices à l'exportation augmentait de 1.1% et 13.1% respectivement. De même, dans le cas des camions, les prix domestiques étaient en baisse de 0.5% par rapport à novembre mais en hausse de 5.0% par rapport à décembre 1991 et les prix à l'exportation étaient en hausse de 1.0% par rapport à novembre et de 14.4% par rapport à l'an dernier.

L'indice des produits métalliques primaires a augmenté de 0.5% en décembre et dépassait de 0.5% son niveau d'il y a un an. Les prix des produits du cuivre, de l'aluminium et du zinc ont exercé des pressions à la hausse, mais l'augmentation a été grandement atténuée par la baisse des prix des produits du nickel, soit de 6.5% par rapport à novembre et de 16.9% par rapport à décembre 1991. Comparés à ceux d'un an plus tôt, les prix des produits du fer et de l'acier ont aussi exercé une pression à la baisse, puisqu'ils étaient inférieurs de 3.6% à ceux de décembre 1991

Highlights

Raw Materials Price Index

Preliminary data show the Raw Materials Price Index (RMPI, 1986 = 100) at 110.2 for December 1992, down 0.2% from the revised November level of 110.4. The decline in the overall index was due to the decrease in the mineral fuels index (-5.4%), the only component posting a decrease this month. The most significant indexes reducing the overall downward movement were those for animals and animal products, up 2.9%, wood (2.4%), non-ferrous metals (2.7%) and vegetable products (1.6%). The RMPI excluding mineral fuels was up 2.4% from the previous month.

The RMPI increased 10.6% over the December 1991 level, mainly because of higher prices for mineral fuels (9.2%), wood (20.0%), animals and animal products (9.4%), non-ferrous metals (9.4%) and vegetable products (8.9%). The RMPI excluding mineral fuels rose 11.4% over the past year, reflecting steady increases in the indexes for vegetable products, animals and animal products, and wood.

The mineral fuels index was down in December 1992 (-5.4%), owing primarily to the movement of the crude mineral oils index (-5.8%). In contrast to this downward movement was the 1.1% increase in the coal index, its fifth in as many months. Despite the lower prices reported for December, the mineral fuels index was higher by 9.2% compared to a year ago, owing largely to higher prices for crude mineral oils (9.5%) and coal (10.9%).

The animals and animal products index posted a 2.9% increase over the past month. Major contributors were cattle for slaughter, with a fourth consecutive monthly increase (6.1%), hogs for slaughter (2.0%), and fish (8.9%). Over the past year the animals and animal products index increased 9.4%, reflecting substantially higher prices for cattle for slaughter (24.3%) and hogs for slaughter (28.9%).

The wood index was up 2.4% in December, primarily because of a 3.4% increase in log and bolt prices, the thirteenth in as many months. The wood index was up 20.0% from its December 1991 level, owing mainly to the higher log and bolt index (28.4%).

December 1992 saw an increase in the non-ferrous metals index (2.7%), owing primarily to higher prices for copper concentrates (5.4%) and aluminum materials (2.6%). Nickel prices declined 4.1%. Over the last twelve months the non-ferrous metals index rose 9.4%, owing to increases in the indexes for copper concentrates (12.2%), radioactive concentrates (34.5%), aluminum materials (17.6%), and gold (4.4%). Nickel concentrates were an offsetting factor, decreasing 17.3%.

The vegetable products index posted a slight increase (1.6%) from November to December 1992, reflecting higher prices for grains (3.6%) and oilseeds (2.8%). The tobacco index was down 5.5%. Rising prices for grains (7.4%), oilseeds (23.3%) and potatoes (25.1%) have resulted in an 8.9% increase in the vegetable products index since December 1991.

Faits saillants

Indice des prix des matières brutes

Les chiffres préliminaires du mois de décembre 1992 indiquent que l'indice des prix des matières brutes (IPMB, 1986 = 100) a diminué de 0.2% par rapport au niveau révisé de novembre (110.4), pour s'établir à 110.2. Cette baisse de l'indice global est due à la chute de prix enregistrée par l'indice des combustibles minéraux (-5.4%), la seule composante ayant connu une baisse ce mois-ci. Les indices ayant le plus significativement contribué à ralentir le mouvement baissier de l'IPMB sont ceux des animaux et substances animales (2.9%), du bois (2.4%), des métaux non ferreux (2.7%) et des substances végétales (1.6%). L'IPMB sans la composante des combustibles minéraux a, pour sa part, affiché une hausse de 2.4% au cours du dernier mois.

Par rapport au mois de décembre 1991, l'IPMB a progressé de 10.6%, principalement en raison des augmentations de prix rencontrées chez les combustibles minéraux (9.2%), le bois (20.0%), les animaux et substances animales (9.4%), les métaux non ferreux (9.4%), de même que chez les substances végétales (8.9%). L'IPMB sans la composante des combustibles minéraux a, quant à lui, crû de 11.4% au cours de la dernière année, conséquemment à la croissance soutenue accusée par les indices des substances végétales, des animaux et substances animales et du bois.

L'indice des combustibles minéraux s'est inscrit à la baisse en décembre 1992 (-5.4%), une diminution dictée par celle accusée par les huiles minérales brutes (-5.8%). Allant à l'encontre de cette tendance baissière, le charbon a affiché une hausse de prix de 1.1%, la cinquième en autant de mois consécutifs. Malgré la chute de prix du mois de décembre, l'indice des combustibles minéraux s'est élevé de 9.2% comparativement à l'an dernier, particulièrement en raison de la majoration des prix des huiles minérales brutes (9.5%) et du charbon (10.9%).

En ce qui a trait à l'indice des animaux et substances animales, il a enregistré une hausse de 2.9% ce mois-ci. Les principaux indices qui en sont responsables sont ceux des bovins envoyés à l'abattage affichant une quatrième augmentation mensuelle consécutive de 6.1%, des porcs destinés à l'abattage (2.0%) et des poissons (8.9%). Au cours de la dernière année, l'indice des animaux et substances animales a augmenté de 9.4%, en raison des bonds enregistrés par les prix des bovins envoyés à l'abattage (24.3%) et des porcs destinés à l'abattage (28.9%).

L'indice du bois a, pour sa part, progressé de 2.4% en décembre, une hausse principalement causée par la majoration des prix des billes et billots (3.4%), la treizième en autant de mois consécutifs. Par rapport à décembre 1991, l'indice du bois s'est accrû de 20.0%, une augmentation majoritairement due à celle affichée par l'indice des billes et billots (28.4%).

Quant à l'indice des métaux non ferreux, il s'est inscrit à la hausse en décembre 1992 (2.7%), principalement en raison des augmentations de prix des concentrés de cuivre (5.4%) et des matériaux d'aluminium (2.6%). Les prix du nickel ont, pour leur part, reculé de 4.1%. Au cours des douze derniers mois, les métaux non ferreux ont vu leurs prix croître de 9.4%, suite à des hausses plus ou moins importantes des indices des concentrés de cuivre (12.2%) et radio-actifs (34.5%), des matériaux d'aluminium (17.6%) et de l'or (4.4%). L'indice des concentrés de nickel a eu un effet modérateur en s'abaissant de 17.3%.

Concernant l'indice des substances végétales, il s'est légèrement accrû entre novembre et décembre 1992 (1.6%), suite aux augmentations de prix des céréales (3.6%) et des oléagineux (2.8%). L'indice du tabac s'est quant à lui replié de 5.5% au cours du mois. Par rapport à l'an dernier, les hausses de prix rencontrées par les céréales (7.4%), les oléagineux (23.3%) et les pommes de terre fraîches (25.1%) sont à la base de l'augmentation de 8.9% accusée par l'indice des substances végétales.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

TABLE 6. Raw Materials Price Indexes

TABLEAU 6. Indices des prix des matières brutes

1986 = 100

		Month – Mois												Annual average – Moyenne annuelle
		Jan. – Janv.	Feb. – Fév	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Dec. – Déc.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
$\sum_i$	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
$\sum_i$	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

CANADA A PORTRAIT

A CELEBRATION OF OUR GREAT NATION

UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of ***Canada: A Portrait*** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: ***This Land, The People, The Society, Arts and Leisure, The Economy,*** and ***Canada in the World.***

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

Canada: A Portrait is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, ***Canada: A Portrait*** (Catalogue No. 11-403E) is available in Canada for $38.00 plus GST, US $41.95 in the United States, and US $48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584.**

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54e édition d'***Un portrait du Canada*** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés : ***Le territoire, La population, La société, Les arts et les loisirs, L'économie*** et ***Le Canada dans le monde.***

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

Un portrait du Canada... un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, ***Un portrait du Canada*** (N° 11-403F au catalogue) coûte 38 $ plus TPS au Canada, 41,95 $ US aux États-Unis et 48,95 $ US dans les autres pays.

CANADA'S ENVIRONMENT

L'ENVIRONNEMENT DU CANADA

Every day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

Human Activity and the Environment is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

Vous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industrielles ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

Activité humaine et l'environnement est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

CASE STUDY: A statistical profile of an Ontario river basin is also included as a case study to demonstrate how socio-economic information can be linked with physical data at a local level.

ÉTUDE DE CAS : un profil statistique du bassin hydrographique de l'Ontario est également présenté, comme étude de cas, en vue de montrer comment l'information socio-économique peut être mise en rapport avec les données physiques à un endroit donné.

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets
- la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

INTER-CORPORATE OWNERSHIP 1992

Will Answer Your Questions About Canada's Corporate Pyramids

LIENS DE PARENTÉ ENTRE SOCIÉTÉS 1992

La publication qui répondra à toutes vos questions sur les pyramides de sociétés au Canada

Inter-Corporate Ownership 1992 is the most comprehensive and authoritative source of information available on Canadian corporate ownership.

Inter-Corporate Ownership lists over 65,000 corporations providing the names of all holding and held companies, ownership percentages and the position of each within the overall corporate hierarchy.

Inter-Corporate Ownership is an indispensable reference source for researching:

- Business-to-business marketing: who owns your corporate clients?
- Purchases: who owns your suppliers?
- Investments: what else does a company own or control?
- Corporate competition: what do your competitors own and control?
- Industrial development: in which province and industry is a corporation active?

Inter-Corporate Ownership 1992 (Cat. no. 61-517) is available for $325 in Canada, US$390 in the United States and US$455 in other countries. To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication. For faster ordering, fax your order to 1-613-951-1584. Or call toll-free to1-800-267-6677 and use your VISA or MasterCard.

Liens de parenté entre sociétés 1992 est la source de renseignements la plus fiable et la plus exhaustive que l'on puisse consulter sur les liens de parenté entre sociétés canadiennes.

Vous y trouverez une liste de plus de 65 000 sociétés faisant état du nom de toutes les sociétés actionnaires ou détenues, du degré de parenté exprimé en pourcentage et de la position de chacune au sein de la hiérarchie globale des entreprises.

Liens de parenté entre sociétés constitue une source de référence indispensable dans les domaines suivants :

- Commercialisation entre sociétés : qui sont les propriétaires de vos sociétés clientes ?
- Achats : qui sont les propriétaires de vos fournisseurs ?
- Investissements : quelles sociétés l'entreprise en cause possède-t-elle ou contrôle-t-elle ?
- Concurrence entre sociétés : quelles entreprises vos concurrents possèdent-ils ou contrôlent-ils ?
- Expansion industrielle : dans quelle province et dans quel secteur d'activité une société oeuvre-t-elle ?

Liens de parenté entre sociétés 1992 (nº 61-517 au Catalogue) se vend 325 $ au Canada, 390 $ US aux États-Unis et 455 $ US à l'étranger. Pour commander, écrivez à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6, ou encore, communiquez avec le centre régional de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication). Pour commander plus rapidement, télécopiez votre commande au 1-613-951-1584. Ou composez le numéro sans frais 1-800-267-6677 et utilisez votre carte VISA ou MasterCard.
